

Anthony Cavuoti

Full Stack Developer

Full Name: Anthony Robert Cavuoti

Address: Torrance, Ca 90503

About Me: My name is Anthony Cavuoti and I actively forge amazing apps that display proficiency in my skills. These apps incorporate various solutions to numerous challenges that occur during full stack development. It would mean the world to me to get an opportunity to be part of a team of passionate developers, to be part of results-driven development, and an opportunity to start my coding career.

- Utilized powerful packages to accelerate application functionality

Singularity Blog / Personal project

URL: singularityplanet.com

- Stunning neuromorphic front end design
- Rapidly prototyped and designed using adobe XD
- Share button functionality
- Reusable CSS classes

Education

Web Developer Bootcamp / Udemy.com

By Colt Steele

In this course, I learned the fundamentals of full stack web development which has allowed me to jumpstart my web dev portfolio and grow my skills even further.

Understanding the Weird Parts / Udemy.com

By Anthony Alicea

This course has taught me how to best utilize javascript to deal with the many challenges that appear in full stack development. This knowledge effectively expedited my web development education allowing me to quickly learn javascript based frameworks like React.

El Camino College / currently attending

Graduated June 2017

My major is in computer science and I have completed classes in c++ data structures and the Java programming language.

West Torrance High School / diploma

Graduated June 2017

Was enrolled in both the high school band and cross country. I remained committed to both throughout the four years as its simply part of my personality to stay committed to what I start.
