Education

Web Developer Bootcamp / Udemy.com
By Colt Steele

In this course I learned the fundamentals of full stack web development which has allowed me to jumpstart my web dev portfolio and grow my skills even further.

Understanding the Weird Parts / Udemy.com
By Anthony Alicea

This course has taught me how to best utilize javascript to deal with the many challenges that appear in full stack development. As a result I can read any javascript source code and understand how the language interprets it.

El Camino College / currently attending
Graduated june 2017

My major is in computer science and I have completed classes in c++ data structures and the Java programming language.

West Torrance High School / diploma
Graduated june 2017

Was enrolled in both the high school band and cross country. I remained committed to both throughout the four years.
